

## Instrument Tip Protectors

Protect your valuable surgical instruments with our color coded instruments tip protectors. Prevent the tip and edges of instruments, including osteotomes and retractors, from damage during handling and sterilization.

Sizes are color coded for an easy identification, perforated in order to reduce vacuum seal and moisture build-up. Radiopaque and steam and gas permeable, not sterile.

### Product details

- Validated for pre-vacuum sterilization
- Multiple color coded sizes
- Steam and gas permeable
- Perforated, reduce vacuum seal
- Can be steam autoclaved at 121° C or 134° C
- Latex free
